

Upcoming Events at the Tech Incubator at Queens College

Future of shopping/retail (Feb 23)

Sascha Eder, Co-founder and COO of NewtonX is giving a talk on the Future of the shopping industry.

The talk will provide insights into the most innovative technology disrupting retailers and the shopping experience, its frontiers, main players in the market, as well as how incumbents and startups are trying to size the opportunity.

The presentation is a result of insights from top research institutions and interviews with experts in the retail space. NewtonX is a technology focused expert network. They have worked with the world's top technology firms to create an analysis of the future of shopping.

The talk will be from 5:30 pm to 6:30 pm. Participants can network before and after the talk. Please RSVP: <https://www.eventbrite.com/e/future-of-shoppingretail-tickets-42166265435>

Smart cities (March 2)

Sascha Eder, Co-founder and COO of NewtonX is giving a talk on the next generation of cities.

The talk will provide insights into how cities disrupt themselves to use technology for a more sustainable and healthier experience in an ever increasingly dense population. How can technology helps us lead better lives in our cities? The talk will cover the market size from a business perspective, main players working on smart cities and prominent examples from role model cities like Barcelona.

The presentation is a result of insights from top research institutions and interviews with experts in the smart city industry. NewtonX is a technology focused expert network.

The talk will be from 5:30 pm to 6:30 pm. Participants can network before and after the talk. Please RSVP: <https://www.eventbrite.com/e/smart-cities-tickets-42166270450>

NYC Open Data Week Event at Queens College (March 4)

University Showcase of Fun and Useful Tools Built Using NYC Open Data - In this workshop, we will tackle the following question: "How might we use NYC open data and CrossCompute platform to create tools for decision-makers in business, agency or civil service non-for-profit organizations, NYC residents, and the general public." Students from Queens College will present tools they have created that use NYC Open Data. CrossCompute is a platform that enables developers and data analysts to build tools for decision makers. Many tools have been created on the CrossCompute platform that uses open source data. Data Science professionals will provide a tutorial on how to use CrossCompute to create tools that analyze NYC Open Data.

This event will be from 3 pm to 4:30 pm at Tech Incubator. Please RSVP:

Industry 4.0 (IoT in Manufacturing) (March 9)

Sascha Eder, Co-founder and COO of NewtonX is giving a talk on one of the hottest topics in the business world: Industry 4.0.

The talk will provide insights into the next wave of industrialization covering robotics, IoT and other technologies that disrupt the manufacturing space like the automotive industry. What

improvements do these technologies bring and how does it affect us? The talk will give an overview of the different technologies, main players and provide real life case study examples.

The presentation is a result of insights from top research institutions and interviews with Industry 4.0 experts. NewtonX is a technology focused expert network.

The talk will be from 5:30 pm to 6:30 pm. Participants can network before and after the talk. Please RSVP: <https://www.eventbrite.com/e/industry-40-iot-in-manufacturing-tickets-42166369747> .

The future of education (March 16)

Sascha Eder, Co-founder and COO of NewtonX is giving a talk on the future of education. One of the few industries in our lives that has not changed in the last 100 years is going through a major disruption. Despite major challenges such as legislation, politics and lobbying, education is undergoing a major change and examples like AltSchool show that it is possible to leverage technology to bring major improvements to learning speed, individualization and customization in the classroom.

The presentation is a result of insights from top research institutions and interviews with technology and education experts. NewtonX is a technology focused expert network.

The talk will be from 5:30 pm to 6:30 pm. Participants can network before and after the talk. Please RSVP: <https://www.eventbrite.com/e/the-future-of-education-tickets-42166393819>

Cybersecurity (March 23)

Sascha Eder, Co-founder and COO of NewtonX is giving a talk on Cybersecurity. Major hacks, bitcoin and an ever increasing use of technology in the world's leading companies has made cybersecurity a topic that is on the world's mind. This topic will cover how the dissemination of sensors and other technology increases the risk of cyber threats and what the leading players in the industry are developing to keep up with hackers, viruses and other cyber threats.

The presentation is a result of insights from top research institutions and interviews with cybersecurity experts and CISOs. NewtonX is a technology focused expert network.

The talk will be from 5:30 pm to 6:30 pm. Participants can network before and after the talk. Please RSVP: <https://www.eventbrite.com/e/cybersecurity-tickets-42166525212>

Predictive analytics (March 30)

Sascha Eder, Co-founder and COO of NewtonX is giving a talk on Predictive analytics. Through a number of case studies, Sascha shows the power of big data and predictive analytics and the different impacts it can have in a variety of industries from consumer goods to the automotive industry and healthcare.

The presentation is a result of insights from top research institutions and interviews with leading data scientists and technology experts in a number of industries. NewtonX is a technology focused expert network.

The talk will be from 5:30 pm to 6:30 pm. Participants can network before and after the talk. Please RSVP: <https://www.eventbrite.com/e/predictive-analytics-tickets-42166537248>
