

Infosys –Entry-Level Associate

Be more and do more at Infosys!

This is a fantastic time to join Infosys! We are growing our US team by the hundreds this year and we are looking for motivated recent graduates like **YOU**. At Infosys, not only will we invest in your technology training upfront as a new hire, we are also committed to continuing to invest in you and your development throughout your career via mentorship programs, continuing education courses with our digital classroom partners, and our Leadership Institute program. We value lifelong learning, creative thinking and foster an entrepreneurial culture, and are looking for entry-level technology associates who share and embody these values.

As an Infosys Associate, you will work on exciting projects with some of the largest companies in the world. You'll be met with many new opportunities, as well as interesting technology and business challenges that will help you grow both professionally and personally. Come amplify your potential and help us co-create the digital and disruptive future of technology and innovation.

This position will require travel and/or relocation.

U.S. citizens and those authorized to work in the U.S. are encouraged to apply. We are unable to sponsor at this time.

What does an Infosys Associate do?

Infosys is a global leader in consulting, technology, outsourcing and next-generation services. We enable clients, in more than 50 countries, to stay a step ahead of emerging business trends and outperform the competition. We help them transform and thrive in a changing world by co-creating breakthrough solutions that combine strategic insights and execution excellence.

As an Infosys Associate, you will spend your day creating and supporting the development of innovative solutions that respond to our clients' ever changing technology needs. You will work on teams to that will:

- 1) Gather and document customer needs and requirements;
- 2) Develop and support the implementation of solutions;
- 3) Perform code review and software testing to make sure everything is working correctly and meeting clients expectations/specifications; and
- 4) Assist in production by researching and responding to issues/concerns, suggesting workarounds, and communicating to all the stakeholders so that issues are addressed by the agreed timelines.

What Are We Looking For?

Basic Qualification

- Bachelor's degree in Computer Science, CIS, or other STEM related major
- Recent Alumni (ideally Spring or Winter 2017).

Preferred Qualification

- Strong background in Software Development/ Programming. Should have knowledge and some prior experience in developing, editing, and deploying code for applications and/or projects (ex. Java, C++, Python, etc).

- Familiarity with software development lifecycle concepts and project management.
- Knowledge of common software testing protocols and methods, ie Functional, Integration, System, or User experience is a plus.
- Good customer service skills. Capable of engaging with a variety of audiences including clients and colleagues to identify needs, assess options, and implement solutions in a timely manner.
- Good interpersonal and communication skills. Able to work effectively on a team and independently. Must be able to communicate in a professional manner by telephone, email, or face-to-face.
- Should demonstrate strong, relevant critical thinking and problem-solving skills through either coursework, class or personal projects, and/or previous work experience.
- High-level of adaptability and a personal committed to continuous learning and professional growth.
- Willingness to relocate anywhere within the US. Travel may be required as per the job requirements.
